

Dear reader,

Our ancestors' ideas about our modern times were often daring and frequently amusing, though very exciting. Many would most likely have come to fruition if, of course, had several ground-breaking inventions that significantly changed the course of history had not appeared.

Sci-fi in days of old remained mere fantasy for hundreds or dozens of years. The rapid technological developments of recent times, however, exceed our wildest dreams every year, and it keeps getting faster.

That makes it more difficult to keep a cool head and discern the inventions that are truly necessary and worthy. We will be pleased to be a good guide and advisor in this world.

May inventions help and support us, not become an encumbrance or lead to our destruction.

USB FLASH DRIVES

• mini usb flash drives	4–8

Standard availability of all the specified products is 2-5 weeks from the time an order is placed, depending on the type of product, quantity, and potential individual requirements. Placing an order includes approval of the final design preview. We will always confirm the delivery deadline for specific products on the basis of your enquiry or order. Please give the quantity, colour, possibly the capacity, and the required printing in your enquiry. Products in stock are identified with the “24h” icon and can be shipped within 24 hours. All catalogue numbers are unique and are used exclusively for the requirements of this catalogue. We can't guarantee the 100% availability of all products in all colours throughout 2018.

A detailed steampunk-themed background featuring a dark, textured surface. Scattered across the surface are numerous brass gears of various sizes, a dark blue top hat with a gold chain and a small gear, a pair of pince-nez, a small brass box, and a USB flash drive. A large, ornate brass frame with intricate gearwork is positioned at the bottom, framing the text. The overall aesthetic is one of intricate mechanical design and vintage style.

USB FLASH DRIVES

Carrying entire libraries or video collections in your pocket is no longer just pure fantasy. This is thanks to the gigantic repositories of knowledge hidden in miniature boxes of all shapes, materials and colours. Dive with us into this world, where there is still so much to discover what is new.

METAL MINI USBs are the most popular type of flash drive. This is especially thanks to their practicality, simplicity, water resistance, capless design and a wide range of available metallic materials, colours and shapes.

PAPER USB FLASH DRIVES - original presentation form for handing over your company data. We will place a snap-out chip with a recorded presentation, catalogue, annual report or other information on brochures or leaflets of various sizes and shapes.

128 MB - 64 GB MOQ 250   CMYK  paper, plastic

A web key is a small USB device that can simply be snapped out of printed packing paper. Unlike a classic USB flash drive, it has no memory for storing or transferring data. This key has a single task, to open the assigned website immediately after being inserted into the slot (plug & play). This is a cheap and very effective form of promotion with a trackable response and an open-rate of 50-80%!

MOQ 250   CMYK  paper, plastic

Nice packaging increases the perceived value of each gift. Whether your USB drives are a luxury gift or a carrier of company data, we will always recommend the optimum packaging for the specific occasion. And your logo can naturally also be applied here.

Packaging sells.

The background is a dark, textured surface covered with numerous brass gears of various sizes. Several steampunk-inspired electronic devices are scattered around: a spherical device with a flame on top and a USB port, a cylindrical device with a flame and gears, a rectangular device with a screen, a device with a large gear mechanism on its lid, and a device with a large gear mechanism on its side. A bright blue lightning bolt strikes down from the top left. In the foreground, a large, ornate brass frame contains a white text box.

POWER BANKS AND CHARGERS

People of the 3rd millennium are distinguished by their uncommon thirst for information. We manage to see and hear more in a single day than our ancestors did in entire weeks or months. To this end we use remarkable devices that would be useless without a constant connection to precious energy, which we constantly carry with us. We store it in small cells so that we can subsequently connect it to our digital companions.

SLIM CRYSTAL POWER BANKS offering unique branding options. The popular LED logo, frequently combined with printing, is able to superbly highlight the most important features of your graphic design, logo or product.

POWER BANK MENU. A power bank menu is a must-have for every modern restaurant, cafe or hotel, always highly praised by guests. Of course it can also be used in shops, on conferences or at larger events. Printed advertising can always be changed. The logo on the base can be applied using pad printing, CMYK or as the very popular LED logo which lights up during charging. Anti-theft lock can be added.
